Electrowinning and Electrorefining

SURVEY OF COPPER ELECTROREFINING OPERATIONS IV-1
Michael Moats (<i>Missouri University of Science and Technology</i>), Shijie Wang, Andreas Filzwieser, Andreas Siegmund, William Davenport, Tim Robinson	
HIGH CURRENT DENSITY OPERATION OF CONVENTIONAL COPPER ELECTROREFINING IV-11
N. Toki (<i>Sumitomo Metal Mining Co.,Ltd.</i>), T. Akiyama, N. Nagase, Y. Hattori	
FAQS WITH REGARDS TO OPERATING A Cu ER TANKHOUSE ABOVE 400 A/m ² USING METTOP-BRX TECHNOLOGY IV-21
A. Filzwieser (<i>Mettop GmbH</i>), M.B. Hanel, I. Filzwieser, S. Wallner	
RECENT OPERATIONAL IMPROVEMENTS AT SAGANOSEKI ELECTROREFINERY IV-35
S. Nagao (<i>Pan Pacific Copper Co., Ltd.</i>), K. Shikada, Y. Yamaguchi, M. Kanazawa	
IMPURITIES MANAGEMENT IN AURUBIS BULGARIA REFINERY TROUGH FLEXIBLE OPERATION CONTROL IV-45
Verka Stoyanova (<i>AURUBIS BULGARIA</i>), Kr. Nedeleva, A. Saraev, L. Gerov, Vanya Stoyanova	
CATHODE CONDITION BASED MAINTENANCE AND IMPROVED QUALITY CONTROL IV-53
M. Larinkari (<i>Outotec</i>), P. Nord, M. Schmidt	
RECENT EXPANSION AND INTRODUCTION OF THE ISA PROCESS AT TAMANO REFINERY IV-67
M. Fujihara (<i>Hibi Kyodo Smelting Co., Ltd.</i>), F. Hashiuchi, T. Nitta, A. Ueno	
RECENT IMPROVEMENTS AT SOUTHERN PERU – ILO REFINERY IV-79
F. Begazo (<i>SOUTHERN PERU COPPER CORPORATION</i>), F. Fernandez	
HIGH CURRENT DENSITY OPERATION AT THE TOYO TANK HOUSE #2 IV-91
K. Kurimoto (<i>Sumitomo Metal Mining Co.,Ltd.</i>), H. Aoki, Y. Yamaguchi, Y. Hattori	
REFINERY MANAGEMENT UNDER THE SHORTAGE OF COPPER ANODE IV-103
Wakiyono (<i>PT SMELTING</i>), Shinichiro Fujichika	

PASSIVATION PREVENTION OF ANODE, A LOW PURITY CRUDE COPPER, IN COPPER ELECTROREFINING IV-115
H. Matsushima (<i>DOWA METALS & MINING CO., LTD.</i>), H. Yatsuhashi, S. Kato, H. Nakano, S. Oue, T. Kamiya, H. Metsugi, H. Takiguchi, Y. Abe	
DEVELOPMENT OF ELECTROREFINING TECHNOLOGY USING THE HIGH IMPURITY COPPER ANODE IV-127
Y. Suzuki (<i>Akita University</i>), Y. Takasaki, A. Shibayama, S. Kawamura, K. Haga	
IN-SITU MICROSCOPIC OBSERVATION OF PASSIVATION OF COPPER ANODE WITH A HIGH IMPURITY CONCENTRATION IV-137
Y. Ninomiya (<i>The University of Tokyo</i>), H. Sasaki, M. Maeda	
SYNERGISTIC EFFECT OF ADDITIVE ON COPPER DEPOSITION FROM ELECTROREFINING SOLUTIONS IV-143
H. Nakano (<i>Kyushu University</i>), S. Oue, H. Fukushima, S. Kobayashi	
THE EFFECTS OF ANODE COMPOSITION AND THIOUREA ON ELECTROREFINED STARTER SHEET DUCTILITY AND ELECTROLYTE COMPOSITION IV-155
Paul Laforest (<i>Missouri University of Science and Technology</i>), Michael Moats	
SLIME MOBILITY, AVAILABILITY, AND TRANSPORT EFFECTS ON CATHODE PURITY IN COPPER ELECTROREFINING IV-167
WeiZhi Zeng (<i>University of Utah</i>), Michael L. Free, Shijie Wang	
ELECTROCHEMICAL NUCLEATION AND GROWTH OF COPPER ON TITANIUM FROM HIGH CUPRIC CONCENTRATED-COPPER NITRATE SOLUTIONS IV-179
X. Li (<i>Northeastern University</i>), L. Jiang, L. Yu, G. Fu	
CONDUCTIVITY MODEL FOR COPPER ELECTROREFINING ELECTROLYTE IV-191
T. Kalliomäki (<i>Aalto University</i>), J. Aromaa, M. Lundström	
CRITICAL CHARACTERIZATION AND MODELING OF ELECTROWINNING SYSTEMS FOR OPTIMIZATION IV-203
J.M. Werner (<i>University of Utah</i>), M.L. Free, W. Zeng	
BISMUTH DISSOLUTION DURING AUTOCLAVE LEACHING OF DECOPPERIZED COPPER ELECTROREFINING ANODE SLIMES IV-215
S. Seisko (<i>Aalto University</i>), J. Aromaa, O. Forsén, M. Lundström, P. Latostenmaa	

USE OF REACTIVE ELECTRO DIALYSIS FOR TREATMENT OF COPPER ELECTROMETALLURGICAL BLEEDS IV-227
S. Cortés (<i>Universidad Técnica Federico Santa María</i>), J. Ipinza, J.P. Ibáñez	
NEXT-GENERATION COPPER ELECTROWINNING WITH AMORPHOUS OXIDE COATED TITANIUM ANODE, MSA®, WITH NO ANODIC SLUDGE FORMATION IV-237
H. Hirai (<i>Doshisha University</i>), T. Zhang, M. Morimitsu	
PERFORMANCE AND COMMERCIALIZATION OF NOVEL COATED TITANIUM ANODES FOR ELECTROWINNING IV-245
T. Zhang (<i>Outotec</i>), T.G. Robinson, H. Aaltonen, R. Haines, L. Palmu	
ANODIC REACTION AND ITS EXCHANGE CURRENT DENSITY ON A LEAD-BASED ALLOY IN ELECTROWINNING PROCESS IV-255
H. Sekimoto (<i>Iwate University</i>), J. Nosaka, K. Yamaguchi	
ELECTROCHEMICAL BEHAVIOR OF PANI/Co ₃ O ₄ ANODE APPLICATION FOR ELECTROWINNING COPPER IV-267
H. Huang (<i>Kunming University of Science and Technology</i>), F.C. Li, Z.C. Guo	
COPPER ELECTROWINNING AND NICKEL RECOVERY FROM BLACK COPPER CONTAINING HIGH LEVELS OF IMPURITIES FROM THE SMELTING PROCESS OF COMPLEX RECYCLING MATERIALS IV-279
K. Ogawa (<i>Kosaka Smelting & Refining Co., Ltd.</i>)	
ENHANCING ELECTROREFINERY AND SMELTER OPERATIONS USING HYDROMETALLURGICAL PROCESSES IV-291
S. S. Rocks (<i>FLSmidth USA, Inc.</i>), P. Keyser, F. Baczek, M. Mulligan, D. Chaiko	
POTENTIAL-CONTROL ELECTROLYSIS AS A NEW EFFECTIVE METHOD OF METALS ELECTROWINNING FROM INDUSTRIAL ELECTROLYTES AND SPENT ELECTROLYTES IV-303
A. Lukomska (<i>Industrial Chemistry Research Institute</i>), P. Los	
DEVELOPMENT AND APPLICATION OF DBSA INTEGRATED COPPER ELECTROLYTIC PROCESS TECHNOLOGY AND EQUIPMENT PACKAGE IV-315
S.P. Yao (<i>China Nerin Engineering Co., Ltd.</i>), W.A. Fu, Y. Liu	

<p>REVOLUTIONARY CHANGES FOR ELECTROLYTIC CELL CONFIGURATIONS IN INDUSTRIAL COPPER ELECTROLYSIS APPLICATIONS</p> <p>Shijie Wang (<i>Rio Tinto Kennecott Utah Copper</i>), Weizhi Zeng, Michael Free</p> IV-327
<p>FROM 2150kW-h/Ton Cueur TO 1750kW-h/Ton of Cueur</p> <p>Robert P. Dufresne (<i>Pultrusion Technique Inc.</i>)</p> IV-339
<p>LIMPACT CATHODES AND AD HYDROMET PROCESS EQUIPMENT HELP OPERATIONS REDUCE THE COST OF ELECTROWINNING AND ELECTROREFINING OPERATIONS</p> <p>David R. Stone (<i>P.I. INTERNATIONAL, INC.</i>), Ronald Pariani, Ernie Hamilton, Clyde Wright</p> IV-351
<p>THE JET OF PARALLEL – A NEW TECHNOLOGY OF COPPER ELECTROLYSIS</p> <p>S. Zhuh (<i>Yanggu Xiangguang Copper Co.,Ltd.</i>)</p> IV-363
